B	Watch-list	31,489.41	35,513.14	4,023.73
D	Sub-standard	15,869.73	49,186.63	33,316.90
E	Doubtful	70,542.41	54,441.91	(16,100.50)
F	Loss	716,530.81	614,684.16	(101,846.65)
Total		**888,051.28**	**805,940.87**	**(82,110.41)**

ix. Segregation of the Finance's Investment portfolio

Investments are segregated as per NRB Directive.

(NRs. '000')

Investment held for Trading:	-
Investment held to Maturity:	1,000,000.00
Investment Available for Sale (Cost) :	120,658.23

3. Risk Management Function

i. Risk Management Committee

Risk Management Committee is a board level committee, which also includes members from risk department and operation department of the finance. This is where overall risk management, including performance of the company is discussed in detail to assess the solvency of the finance and necessary instructions are issued to concerned division and recommendations are made to the Board for necessary deliberation and implementation.

ii. Internal Audit

Independent external firm has been appointed for internal audit of the Finance which is independent from the Management and directly reports to the Audit Committee.

iii. Oversight Control of Branch

Branch has been visited regularly by Head of Department and has its oversight control by Head of Department and Management.

iv. Credit Risk Management

The company has its own Credit Policy in place which guides in generating business. The company has clear demarcation on business generation and risk management where any credit proposal for approval is passed through fit and proper test, long term soundness test with knowledge on business, against which credit is to be sanctioned.

The company has set up a separate Credit Risk Division, headed by Credit Risk Head, one of the most senior level positions in the company. This division is independent to business and does not have any targets, nor have any incentive for business generation. This division oversees global, macro, micro and unit level risk that arises out of daily business operations and equally due to changes in the market conditions affecting business.

There is a separate Credit Administration Department (CAD), which prepares security documents for execution and takes custody of the document executed in presence of Relationship Officers. CAD is also independent to business and ensures safety and concerns of borrowing units, through post relationship assessment. Quarterly inspection of the business and suggestions for timely corrective actions help to protect borrower as well.

v. Operational Risk Management

Board and senior management of finance places high priority on effective operational risk management and adherence to sound operating controls.

- Dual control Mechanism
- Proper monitoring and internal reporting
- Business Continuity Plan
- Good Corporate Governance
- Central monitoring of transactions from Head Office
- Separate Operation Risk department has been formed for identification and minimization of operation risk.
- Segregation of duties and clear lines of management responsibility, accountability and reporting
- Policies/Guidelines explicitly support the identification, assessment, control and reporting of key risks

vi. Market Risk Management

Market Risks are discussed at Asset Liability Management Committee (ALCO) of the company and even discussed at respective division levels on open position on daily basis. The limits for open position are controlled, level wise, which ensures in-depth knowledge of the market and movement before taking decision (by choice). The monthly reports on such aspects are well discussed and dealt with in ALCO.

ALCO ensures functioning of the jobs in line with the policies and procedures and suggests/recommends necessary steps collectively to address the risk on interest rate movement and equity price changes.
Most of the market operations (investments) and exposure accounting include booking of income/expense done by Treasury Department report.

Adequate care is taken to ensure the maturity of deposits matches with assets maturity. Adequate liquidity is ensured even in stressed scenarios. Various ratios as per liquidity risk management policy are assessed. Treasury department plays the vital role in monitoring same and reports to ALCO.

vii. Liquidity Risk Management

Liquidity ratios are accessed and communicated to ALCO members on daily basis. As such, actions with regards to asset liability management, if any warranted from liquidity perspective, are promptly initiated. Compliance with mandatory liquidity ratios is always maintained.

Quarterly Stress Test results also include scenario analysis on liquidity ratios. Management oversight on liquidity risk management is ensured through discussion on the Stress Test results at management level (ALCO), Risk Management Committee, and the meeting of Board of Directors.

Towards liquidity risk management, if additional liquidity may be required, the company has access to different sources of funding such as existing institutional deposit relationships, interbank market, and central bank funding mechanisms.

viii. Compliance Risk Management

The company has separate divisions to oversee operation risk including Compliance of KYC and AML. The division is headed by senior level officials with adequate access to the daily report, operational processes and right to recommend changes in the system and procedures.

ix. Strategies and Policies

Risk management strategies and policies are paramount to mitigating risks that are faced by Finance. In addition to maintaining adequate capital, the responsibility of the finance also lies in maintaining a balance between risk and return. Therefore, effective risk management is a must for sustainability of bank and financial institutions. Apart from the business credit department, a separate credit risk department has been formulated, and middle level staff have been handling the responsibility of ensuring that the risk management guidelines are properly placed and executed. Regarding operation risk, operation risk management policy has been formulated, and effective channels are being formed to ensure that the policies are thoroughly followed. The Asset Liability Committee looks after the market risk, and meetings are held periodically to ensure that the finance takes proper decisions based on the market situation.

x. The Structure and Organization of the Relevant Risk Management Function

A senior level staff member has been appointed who is responsible for ensuring that the credit risk is identified and mitigated. In operation, AML/CFT unit has been created, and an experienced senior level manager has been appointed as compliance officer who also looks after the operation risk. The ALCO looks after the market risk. The Asset Liability committee has members from different departments and therefore identification of risk and mitigating actions are decided right promptly. Apart from this, risk management committee, consisting of board members, duly considers the situations and issues of risks faced by finance and further provides directions to reduce and mitigate risks.

xi. The Scope and Nature of Risk Reporting and / or Measurement Systems

The risk identified from credit, operation and market risk departments are further discussed in management meetings, ALCO meetings and are placed before the risk management committee. The internal audit department also reviews the risk at every level and reports to the audit committee.
